

Mr. Oberhoff's experience includes over 12 years experience in project management, conducting special-status species surveys, commercial fisheries data analysis, university based research projects, long-term monitoring programs for sensitive species and land condition trends, teaching biology related courses at local university and the use of global positioning systems.

As a project manager Mr. Oberhoff has performed a variety of tasks, which included writing proposals and scope of works, developing budgets, determining staff requirements, managing sub-consultants, delegating tasks to qualified staff, ensuring milestones are met, editing draft reports and submission of final reports to client and/or requesting agencies. As a project manager for the Central Coast Groundfish Project, Mr. Oberhoff is responsible for the management of all data collection, fishing trip coordination, observer coverage, database management, staffing for project, commercial fisheries data analysis and reporting requirements.

Mr. Oberhoff has served as project manager and environmental compliance monitor on numerous very large and contentious projects in San Luis Obispo and Santa Barbara Counties. Past environmental compliance monitoring experience includes both small and large-scale construction projects for private clients and San Luis Obispo and Santa Barbara Counties. Projects included compliance monitoring for The Woodlands, Providence Landing, Rice Ranch, The Colony at Apple Valley, the Woodridge development, Foothill Boulevard Bridge Replacement, multiple bridge demolition and construction projects at Camp San Luis Obispo and numerous Morro shoulderband snail-monitoring projects in the Los Osos and Morro Bay area. Mr. Oberhoff also served as the lead environmental compliance monitor for the Los Osos Wastewater Project during the initial groundbreaking and construction that began and ended in 2005.
